EDUCATION

Ensign College

Bachelor of Applied Science in Software Engineering

Salt Lake City, UT

Expected Apr 2027

- Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming (OOP), Cloud Computing, Database Design.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (TypeScript), SQL, C++

Frameworks & Web: Next.js, Node.js, React, REST APIs, HTML/CSS

Infrastructure: Linux (Ubuntu/Debian), Docker, Git/GitHub, Proxmox, Bash Scripting

AI & Hardware: PyTorch, ROCm, llama.cpp, Local LLM Inference, Model Quantization

PROJECTS

ROCm Accelerated Inference Engine | *Linux, Proxmox, PyTorch, Bash*

Nov 2025 – Present

- Engineered a high-performance local inference server for Large Language Models (LLMs) on AMD hardware, utilizing **ROCm** drivers to bypass standard CUDA dependencies.
- Containerized the environment using **Proxmox** (LXC) and systemd services, optimizing resource allocation to achieve real-time token generation speeds.
- Implemented **Bash** automation to handle model quantization (GGUF), reducing memory usage by ~40% without sacrificing model accuracy.
- Exposed an OpenAI-compatible API endpoint to interface with local development tools, creating a private, offline-capable AI development stack.

DocRelief AI | *Next.js, TypeScript, LLM Integration*

Jan 2026 – Present

- Co-developing a full-stack AI platform designed to streamline document processing using **Next.js** and **TypeScript**.
- Collaborating in an Agile team environment (GitHub), utilizing strict **Git** workflows (Feature Branching, Pull Requests, Code Reviews) to ensure codebase integrity.
- Integrating Large Language Models (LLMs) to parse and summarize complex text data, optimizing frontend performance for low-latency user interactions.

Python Automation System | *Python, APIs, Data Structures*

Self-Directed

- Designed and built a Python-based automation script integrating third-party APIs to streamline data entry processes, reducing manual workload and increasing efficiency.
- Applied algorithmic logic to analyze datasets, achieving high accuracy in predictive modeling tasks.

PROFESSIONAL EXPERIENCE

BMW Group

Automotive Assembly Technician

Araquari, Brazil

Mar 2016 – Dec 2017

- **Quality Assurance & Precision:** Executed high-precision assembly for luxury vehicles, strictly adhering to Standard Operating Procedures (SOPs) to maintain a zero-defect quality standard.
- **Process Optimization (5S):** Applied 5S Methodology to organize workflows and minimize waste, ensuring operational efficiency in a high-volume production line.
- **High-Volume Production:** Contributed to a daily output of 200+ units, consistently meeting aggressive production targets while adhering to rigorous safety protocols.

VOLUNTEERING

Santos Dog Care

Animal Rescue Logistics Coordinator

Brazil

2012 – 2018

- Managed logistics and care for rescue operations, providing medical attention and shelter for stray animals.
